

Dual List *with* Vanderbilt Lung Transplant

Why Dual List?

Patients can choose to be evaluated at two or more transplant hospitals for registry on the United Network for Organ Sharing (UNOS) waitlist. Organ Procurement and Transplant Network (OPTN) allows dual listing and is at the discretion of the transplant hospitals. Most of the evaluation completed at the initial listing center can be utilized for the evaluation at VUMC.

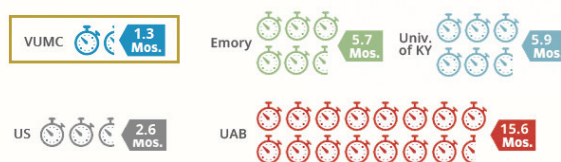

Dual listing with two or more transplant centers may shorten the wait time of patients waiting for a lung by increasing the donor encatchment area.

Why Vanderbilt?

Our lung transplant program has been saving lives since 1990 and has performed over 600 transplants. Located in a region of the country with high donation rates, our median wait time to transplant is 1.3 months compared to a national wait time of 2.6 months. Shorter wait times translate into safer operations performed prior to the development of major complications of advanced lung disease. As a top 10 national program by volume, it is no surprise we have exceptional lung transplant outcomes for adult graft and patient survival. With a shorter length of stay, our patients go home 5.5 days sooner than the national average. Our decades of experience exemplify the best possible quality of care for patients who need lung transplants.

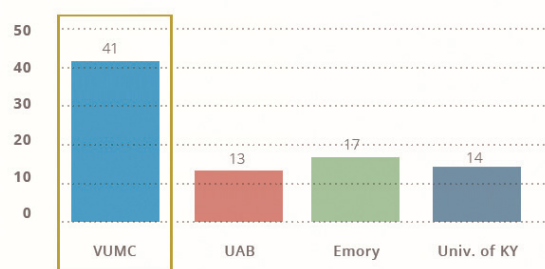

WAITLIST

MEDIAN TIME TO TRANSPLANT (MONTHS)

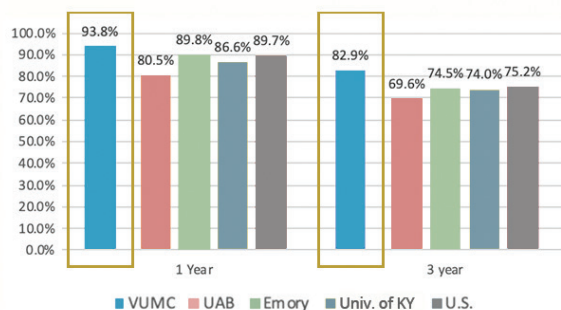

Candidates registered on the waiting list between 1/1/2015 and 6/30/2020.

2020 LUNG TRANSPLANT VOLUME

1-YEAR AND 3-YEAR SURVIVAL RATES*

*1-year transplants between 1/1/18-3/12/20, 3-year transplants between 7/1/15-12/31/17

Patient Referrals: 615-936-0393 | VanderbiltHealth.com/program/lung-transplant
